Reverse Cycle Portable Air Conditioner

Compact comfort

- 3.5kW cooling capacity
- Reverse cycle heating function
- Dehumidifies up to 60L per day
- Guaranteed cooling in 35°C
- Self-evaporative system reduces need to empty drip tray or use drip hose
- Soft touch control panel
- Heat and cools up to 35m²
Dimplex brings you comfort by design

Keeping you and your home cool will be a breeze this summer with a Dimplex Portable Air Conditioner. Featuring a contemporary design, intended to be unobtrusive and blend harmoniously with existing decor, these units come in a size to suit cool large sized rooms.

Packed with innovative features, these units are guaranteed to cool even in extreme temperatures, providing all the quality and reliability that you’ve come to expect from Dimplex.

Guaranteed Cooling in 43°C
Summer can reach temperatures of over 35°C where most cooling systems won’t function. Dimplex DC12RC Portable Air Conditioner is guaranteed to work effectively at 43°C Celsius. Dimplex will keep you cool when you need it most.

Dehumidifying Function
Summer can bring high levels of humidity causing discomfort to many people and damage to home furnishings. Humidity or water vapour in the air above 50% can cause the growth of mildew, dust mites, and mold that leads to allergies and asthma. All Dimplex Portable Air Conditioners come with a dehumidification feature that not only cools your home but also reduces unwanted muggy humidity.

Self Evaporative Function
Dimplex Portable Air Conditioners are equipped with a self evaporative system for cooling, which removes excess condensation by means of evaporating the water in the drip tray. Therefore reducing the hassle of having to use a drip tray or drain hose.

So sleep and breathe easy this summer with your Dimplex Portable Air Conditioner.

Portable cooling has never been easier

Soft touch control panel
Multi directional air outlet
LCD remote
