

CDE2TI 2kW White Micathermic Heater with Timer

Micathermic heaters are electric heaters which utilise both radiant and convective heat. The heating element is encased in thin sheets of mica which heats the room up very quickly.

Dimplex micathermic heaters are the only micathermic heaters in the New Zealand market with heat direction selection. This allows you to place the heater tight up against walls and furniture without the risk of overheating them.

- 2kW heat output
- 7 day timer
- Thermostat
- Integrated cord storage
- Silent operation
- Heat direction selection; direct heat to where you need it, increase efficiency and place closer to walls
- 30% more efficient than heating oil columns

Model	CDE2TI
Dimensions (mm)	250(w) x 614(d) x 605(h)
Wattage (watts)	2000
Thermostat Control	Yes
Finish	White
Remote Control	Yes
Warranty	5 years
